PRIVILEGE

PROCESS UNDER CONTROL

OUR SERVICE

- Automation Solutions
- Field Instruments
- Control Valves
- Fittings & Tubes
- Flow Elements and Temperature Elements
- Off Grid Solar System
- Explosion Proof Lightings & Enclosure
- After Sales Services

INDUSTRY FOCUS

- Oil & Gas
- Petrochemicals
- Fertilizers & Chemicals
- Food & Beverage
- Water & Wastewater
- Energy & Utilities
- Metal & Steel Industry
- Contractors

OUR MISSION

Dedicating ourselves to optimizing the efficiency and profitability of our clients' businesses by delivering high quality products and services that boost their operations and improve ROI.

OUR PARTNERS

Through the collaboration of our valued partners, we are able to deliver more innovative, impactful, and successful projects. Their ongoing support has been crucial in helping us achieve our Mission and Vision.

Our partners enable us to enhance our value offering, address a wider array of client needs, and expand our presence both locally and globally.

TECNOMATIC has been founded in 1962, Tecnomatic designs and produces flow and temperature measurement devices leading manufacturer of flow measurement devices and temperature measurement devices for more than fifty years, Tecnomatic is the 1st European company for flow measurement devices

TechLED was established in Istanbul, Turkey in 2010 after 5 years of R & D studies to analyze the needs of the sector and to produce lighting fixtures that meet the needs exactly. TechLED has since closely followed the developments of light technology and has played an active role in the development and expansion of innovative lighting solutions.

TechLED, which continues to grow continuously since its inception, produces the most efficient lighting fixtures thanks to its teammates who care about lean needs, minimum consumption and energy quality.

TERRANOVA® unites Italy's historic Process Instrumentation Brands — Spriano®, Valcom® and Mec-Rela — carrying forward a strong manufacturing tradition. We offer a broad, reliable portfolio of solutions for the process industries, built on experience, precision and consistent customer focus.

Since 90 years, Spriano® designs and manufactures electronic & pneumatic instrumentation. More than pressure, level & temperature transmitters, Spriano® is a leading manufacturer of torque tube level transmitters with Hart® & Fieldbus® protocol, whose reliability is worldwide recognized, today also for special applications (PED category IV).

Since 1974 Valcom® designs, develops and manufactures measuring and control instruments for industrial processes. Decades of experience and efforts in developing innovative products for the measures of level, pressure, differential pressure, vacuum, temperature, flow, density, gloss, consistency and oil mist, make Valcom® Your ideal partner for sensors and control equipments.

In 1976, a complete line of Control Valves were engineered and manufactured with the name of Mec-Rela®, providing effective and efficient solutions for Industrial applications also in extremely harsh conditions.

DELLA FOGLIA was founded in 1962 by Mr. and Mrs. Della Foglia as a small artisan company of ball and needle valves. Over the past 60 years, our company has expanded its production range, acquiring considerable experience and a high degree of specializations; becoming an important player in the global energy markets. We are focusing on the emerging markets of renewable energy by offering technical competency and complex products, for the research and development of a new eco-friendly and sustainable future.

OUR PRODUCTS

We can provide a wide range of valves, with a totally customized design for all types of services

INTERTEC uses a proprietary composite material of glass fiber reinforced plastic or glass fiber reinforced polyester (GRP) to construct protective enclosures, cabinets and shelters.

The basic adaptability of this high-tech material enables the enclosures to fulfil one or more application-specific protective functions.

It offers unbeatable advantages in terms of strength to weight ratio and corrosion resistance material in the manufacture of enclosures for use in harsh environmental conditions.

Since our inception in 1965., Astec has been serving the Oil & Gas, Refining, Petrochemical, Thermal Gas Nuclear Power Plants, Chemical, Shipbuilding, CNG sectors. Today we cover 40 countries with over a MILLION installations. This website will showcase our standard range of Instrument Tube Fittings Needle, Ball, Gauge, Manifold, DBB & Mono Flange Valves. We also provide integrated assemblies i.e. Sampling Systems and Skids.

Today Astec teams are Proud to be working for most Instrument & Piping Engineers developing INNOVATIVE solutions to optimise their process measurement, productivity and maintenance downtime needs. Astec is slowly becoming popular for our award winning range of Instrument CCHU or Close Coupled Hook Ups or PLUG & PLAY Instrument hook ups assemblies. This technology has proved to save huge cost time and joints on process and instrument lines. We call them Instrument SMART CCHUs.
